Warranty and Service Record Booklet

INTRODUCTION

We are delighted that you have chosen Suzuki as your new vehicle and are confident that it will give you a great deal of enjoyable motoring.

The Suzuki Motor Corporation has factories in many different parts of the world and has over 75 years experience in a wide range of motor vehicle & engineering technologies. Suzuki uses the finest modern materials, up-to-date technology and computer engineering processes to produce vehicles which combine performance and economy with ease of use, whilst minimizing their impact on the environment.

Every Suzuki design has evolved from study of the detailed requirements of our customers, followed up by stringent performance and endurance testing to give you confidence in your new vehicle.

Through your Suzuki dealer you can receive the support of the Suzuki Family and the many services that the dealer network will have to offer you.

QUALITY & MAINTENANCE

QUALITY CONTROL

Your Suzuki Vehicle was manufactured under an internationally recognized system of continuous inspection to ensure that it was in the best possible condition when it left the assembly plant. The final stage in the quality control system was completed by your Suzuki dealer who carried out a Pre-Delivery Inspection before you took delivery. This check is carried out to ensure that your vehicle is in first-class condition and also to remove any protective materials that were applied in the plant to preserve it's appearance.

You can maintain this high quality by having your vehicle serviced at the recommended intervals by your Suzuki dealer.

Maintenance Schedules

In the Inspection and Maintenance section of your Owner's Manual you will find full details of Suzuki's recommendations for your particular vehicle. These schedules should be followed to ensure that your vehicle performs to its optimum.

Your Owner's Manual contains further important information concerning general maintenance, seasonal settings and off-road driving procedures. If in any doubt on any of the details within the Owner's Manual, your dealer will be happy to advise you.

WARRANTY AND THE SUZUKI DEALER

It will be advantageous to have any servicing and warranty repairs that may prove necessary carried out by the authorized Suzuki dealer from whom the vehicle was purchased. This dealer will be familiar with the history of your vehicle and be able to give you the best possible service.

NEW VEHICLE WARRANTY STATEMENT

“Distributor Name” warrants that your new Suzuki Vehicle has been produced in accordance with the manufacturer’s highest standards and has been inspected before delivery to you.

We therefore assure you that in the unlikely event of any part of the vehicle becoming defective due to faulty materials or manufacturing within the warranty period, the part will be repaired or replaced by an authorized Suzuki dealer with no charge for parts and/or labor. The warranty period extends for a period of (36) months or (60,000)km (whichever) occurs first) from the date the vehicle is first put into service or is first registered (whichever is the earliest...the warranty starting date is show in the section “Vehicle details”).

The only conditions or exceptions to this warranty are:-

- The vehicle must have been operated in accordance with the instructions in the Owner’s Manual and must have been serviced as recommended by the vehicle manufacturer in the Owner’s Manual.
- The vehicle must not have been neglected, misused, overloaded, modified or used for racing or rallying.
- This warranty does not apply to parts not supplied by Suzuki or to defects arising from the fitment of parts not made or approved by Suzuki.
- The normal deterioration of consumable parts, such as tyres and fiction materials etc., and the routine replacement of service parts, such as filter and spark plugs etc are not covered by this warranty.

THE SUZUKI SERVICE PLAN

The Suzuki Service Plan is designed to enable you to ensure that your vehicle is maintained in the best possible mechanical condition by being regularly serviced at the recommended intervals.

Your Owner's Manual contains a section detailing the frequency and content of the Suzuki recommended maintenance services. The later part of this booklet consists of a number of pages containing a record of these maintenance services. They should be stamped by your dealer on completion of each service.

Proper maintenance is vital for your safety, for your vehicles long life and to ensure that you retain the benefits of the warranty offered. Do not ignore this important area.

DAILY INSPECTION

In conjunction with the Periodic Maintenance Scheduled in your Owner's Manual, you should carry out a daily inspection to ensure that your vehicle is always fit for the road. In this way you can also identify possible faults and have them rectified before they become a problem or cause a breakdown. This inspection is fully explained in your Owner's Manual.

CAUTION: If you discover any faults during your daily inspection, or during, please get them rectified immediately at the nearest authorized Suzuki dealer. It may affect your safety.
